COMPANY HISTORY

Sanwest Pty Ltd was established in 1987 when the Equipment Division of Mitchell Cotts Engineering was sold to the then Manager Mr Ken Hollick. With other existing personnel who had a long association with Australian industry, the new company was established to continue marketing the product range suited to Australian mining and process industries.

Stuart Page joined the company in 1991 and became an Owner/Managing Director in 1997. He remains in this position today.

In the ensuing years Sanwest has enhanced its equipment range and experience and has become a market leader in Australia for the supply of equipment in the following areas:

- Conveyors (Sanki/Sancon)
- Magnetic equipment
- Metal detectors
- Vibrating motors
- Bucket elevator components
