

Extend your mine life with Sensor Sorting

- > Upgrade feed quality
- > Reduce concentrator load
- > Increase yield
- > Improve process efficiency

Sensor Sorting Systems for Mineral Ores

Our systems separate mineral ores from gangue to recover valuable metals. Steinert's sensor sorting systems will develop consistent head grades which will help deliver operational returns through:

- > reduced operating costs
- > enhancing future expansion needs
- > using a waterless system
- > better production planning

Steinert focuses on providing technical solutions to identify free and encased minerals including:

- > Induction Sorting Systems (ISS)
- > Xray Sorting Systems (XSS)
- > Colour Sorting Systems (KSS)
